Dear Hiring Manager,

I want to apply for the position In your Company Please find my attached resume for your review and consideration of my skills. I am a tech savvy person with attention to detail and complex problem solver. I have a knowledge of Microsoft Office tools with some basic network skills. Plus exposure and experience with Html / Css / JavaScript / JSON / AngularJs / React / React-Native / Express + MongoDB + Node JS / Github. I have ability to analyze data and communicate ideas clearly.

My Current Professional experience with Nucamp is, I completed **Full stack Web-Development** course. I worked at Nucampsite full stack project from start to end with Database and Servers. I created and design 2 responsive static websites in 4 months period of my bootcamp.

I am in **ServiceNow** Fundamentals Bootcamp right now, where I learned ITIL-3 Basics first, then SDLC such as Agile Development, Scrum and Waterfall Methodologies and then service now Fundamentals. I am going to attach my ServiceNow Capstone project with my online resume.

I learned how to complete projects on time, deal with customers to win customers. As an achiever, I have immense satisfaction in being busy and productive. I have a great **desire to learn** and want to continuously improve. I prioritize projects based on how much influence they will have on their organization or the people around them. I would like to bring these perspective to your team to help enhance your mission.

Sincerely,

Salmoon Samuel
